

**AERONAUTICAL TELECOMMUNICATIONS NETWORK PANEL**

**ATN Internet Working Group (WG2)**

**2nd Meeting**

**Melbourne, Florida - 23rd - 27th January 1995**

**Proposed Structure for WG2 ATN Validation Report  
“Product 3”**

(Presented By Akhil Sharma)

**Summary**

The first WG2 meeting endorsed the recommendation for the development of an ATN SARPs Validation Report (“Product 3”) based on the recommendations in WG2-WP/2) for presentation to the second meeting of the ATN Panel (ATNP/2). In order to get the development of this deliverable initiated this paper proposes an initial high-level outline for the deliverable.

## 1. Introduction

The first meeting of the WG agreed on the need to develop a ATN SARPs Validation Report ("Product 3") based on the proposals contained in WG2-WP/2. In order to initiate development of this deliverable this paper proposes an initial high-level outline for the Product.

The first meeting of the WG also defined an 'ATN Validation Strategy', the contents of which, it is proposed be used as the basis for the Validation Report.

## 2. Proposed Structure for the Validation Report

### 1. ATN Validation Strategy

This section will be based on the contents of the agreed Validation Strategy as developed at the first meeting of the WG.

### 2. ATN Requirements Database

This section will provide a high level description of the ATN DB and its relationship to Products 1 & 2 and the role it has played in supporting the validation of Products 1 & 2.

### 3. Validation Initiatives

This section will provide the reader with a high level summary of validation activities that have taken place on a per State/Organisation basis, in terms of the means of validation that has been agreed in the above referenced strategy.

### 4. Validation Results

This section will document, in detail, the results of each of the validation initiatives. Ideally, these results should refer to the ATN Requirements Database.

### 5. Conclusions

Based on the validation results achieved through the 'validation period' this section should conclude that the CNS/ATM-1 draft SARPS & Guidance Material have been validated to a sufficient level (assuming that they have !) in order to be submitted by ATNP/2 to the ANC process for State approval and subsequent inclusion in Annex 10.

## 3. Proposals

The WG is invited to:

- a. reaffirm the need for 'Product 3' to be developed and presented to ATNP/2;
- b. review and comment on the above proposed structure for Product 3 and
- c. initiate the development of this Product.
